### **Hyperparathyroidism - Wikipedia**

A condition called hyperparathyroidism can cause such a situation to happen, where your levels of calcium in your blood and tissues are too.

### **Hyperparathyroidism | Cleveland Clinic**

Hyperparathyroidism is a condition in which one or more of the parathyroid glands become overactive and secrete too much parathyroid hormone. Symptoms.

## **Normocalcemic hyperparathyroidism**

Primary hyperparathyroidism is a disorder of the parathyroid glands, also called parathyroids. "Primary" means this disorder originates in the parathyroid glands.

Hyperparathyroidism is where the parathyroid glands, which are in the neck near the thyroid gland, produce too much parathyroid hormone. This causes blood.

In , normocalcemic primary hyperparathyroidism (PHPT) was recognized as a variant of PHPT, and has yet to be thoroughly characterized. It presents with.
