The 91 Figure 3. Web services are going to make many of the issues surrounding data capture from automated lab systems, clinical data capture systems, enterprise resource planning ERP systems, and external organizations much easier to overcome. What is the savings potential? It is just a private trading network between retailers and suppliers. But try to share that data with trading partners, and what happens? Perhaps the biggest challenges in implementing SAP were change management – the acceptance of global standard processes, and changes in cultural philosophy. But how will end-users – be they employees, partners, or customers – actually benefit? As a result of the technology boom of the last few years, many companies have invested in best-of-breed technology for the Internet – customer relationship management, e-Procurement and supply chain optimization are all examples of such investments.
